EXPERIENCE   2022 – Present

DVS Digital Services
Web Developer/Web Designer
- Designed and developed website for a small business advisory firm utilizing Bootstrap 5.3, NodeJS, and ExpressJS. Assisted the business with other services such as web hosting, E-mail setup, logo design, and business card printing.
- Working on various other websites for small businesses.

Personal Projects
- Built two desktop PC's from scratch which required researching various components, software licenses, integration and testing.
- Developed a GPA calculator utilizing HTML, CSS, and JavaScript, developed a JavaScript based weather app that utilizes the OpenWeather API and the Plotly JavaScript library to make a graph of future temperatures, and various other projects with their code posted to my GitHub. (GitHub: dmanslick)
